EDUCATION

Our Own English High School, Sharjah(UAE)

High School Diploma

Hindustan Institute of Technology and Science, Chennai

B.Tech in Computer Science and Engineering (Specialisation in Cloud Computing).
(2018-2022)

SKILLS

Python, JavaScript, C, C++,
Django, Flask, Flutter, Linux,
Git, SQL, MongoDB,
PostgreSQL, Firebase, NodeJS,
Docker, Agile Management,
Product development

ACHIEVEMENTS

Global Innovation Challenge

Top 2 finalists at the Global Innovation Challenge hosted gems foundation and Singularity University

Gulf 3D printing Competition

Runner up at the gulf 3D printing competition

Paper Publication

Published a paper on attendance system using facial recognition at IEEE ICOSec 2020.

Young Innovator Award

Innovator of the year award.

Inter/Intra-School Competitions

Various prizes and awards at different inter/intra-school competitions.

LANGUAGES

English, Hindi, Malayalam

CERTIFICATES

Applied Scrum for Project Management

PROJECTS

Project Doran

A financial solution for employees to bridge themselves between paychecks. Currently in the initial phase of development and market research, and pushing towards a market release.

Pentagon

A housing solution built from cardboards that are scalable and rapidly deployable. Won Global Innovation Challenge conducted by Gems Foundation and Singularity University, with interested investors.

- Product development and design.
- Integral part of project ideation to GTM strategising, building a viable and monetizable product.
- Building a business plan and pitch deck by market analysis, phase strategising, and viability of implementation.
- Underwent mentorship from various mentors and an advisory firm on business development.

Attendance system using facial recognition

An attendance system using a facial recognition system made with python. Presented and published as a research paper at IEEE ICOSSEC 2020.

- Developed the system in flask and sqlite3, using face-recognition module.

NFC based attendance app

NFC based non-proxyable attendance app made in flutter.

- Complete development of the app from designing the UI/UX to development.
- Firebase integration.
